Dear Paul,

Thank you for sending me a PDF of your talk at the recent Liszt Conference in Budapest. I read it with profit and I am glad to have your text on file, well in advance of its official publication which, as you say, may be long delayed. Your writings on the topic of Liszt and key-characteristics, which have occupied so much of your professional life, are important and make a difference. Not all musicologists are able to make such a claim.

With best thanks for your message and for your work.

Alan
